

MOUNTAIN CHALET 20m²

Extend + 8 m²

STROHBOLD

Scale: 1:50 | A3

Date: 30.01.2024

FURTHER INFORMATION AND CONDITIONS:

- The surfaces of the construction are treated with LIGNEA RESEDA exterior wood oil special mixture, depending on the color, either with a mixing ratio of 12% or 4% . They can be re-oiled if necessary. Wooden elements exposed to the weather and the floor are oiled with 12%, the remaining elements with 4%. Wooden elements that are exposed to the weather should be re-oiled annually for longer durability.
- If the translucent membrane is damaged due to excessive mechanical stress (vandalism, hurricane), it can be repaired with Tesa-ultra-power-clear repair tape.
- To avoid dampness, the space underneath the construction must be kept free of plants or similar objects. 20 cm of ventilation under the wooden construction must always be guaranteed.
- In case the translucent membrane gets dirty, it can be cleaned carefully either with a telescopic brush or/and cloth with water. If heavily stained, clean it with a PVC (membrane) cleaner.
Make sure not to damage the surface coating (no high-pressure cleaner, etc.)
