## ADD-ONS

### Terrace (Add-On)

The Glamping unit can be extended with a 8 m<sup>2</sup> terrace on one or on both sides.

### Insulation (Add-On)

An additional thermal and noise insulation can be installed in combination with glass facades.

## FUNDAMENT | STABILITY

### TEMPORARY USE

Can be installed as a temporary outdoor solution on concrete slabs, on stilts, on a trailer, on a ponton or as a tree house.

Snow load	20 kg/m <sup>2</sup>
Wind load	100 - 140 km/h**

### PERMANENT USE

Can be anchored to the ground as a permanent outdoor solution. A leveled gravel surface is required, so our assembly team can set up the Glamping unit.

Snow load	100 kg/m <sup>2</sup>
(Canopy)	100 kg/m <sup>2</sup>
Wind load	140 - 160 km/h**

\*\*By default, the Glamping unit is designed to withstand wind speeds up to 140 km/h. For areas with higher wind speeds, additional ballasting and concrete strip fundament can be added. This allows the accommodation to handle wind speeds up to 160 km/h.

More details about the Glamping unit can be found on our website
