## STABILITY

### LIGHT

The pavilion features a single STROHBOiD wooden lightweight construction as a standard.

Ultimate load	2.000 kg
Snow load	20 kg/m <sup>2</sup>
Wind load	100 - 140 km/h**

### STRONG (Add-On)

The pavilion can be extended with a double STROHBOiD wooden structure for more resistance.

Ultimate load	10.000 kg
Snow load	160 - 190 kg/m <sup>2</sup>
Wind load	140 - 160 km/h**

\*\*By default, the pavilion is designed to withstand wind speeds up to 140 km/h. For areas with higher wind speeds, additional ballasting can be added, and the structure can be recalculated for the specific location. This allows the pavilion to handle wind speeds up to 160 km/h.

## FUNDAMENT

### TEMPORARY USE

Can be installed as a temporary outdoor solution on concrete slabs. A leveled gravel surface is required, so our assembly team can set up the pavilion.

### PERMANENT USE

Can be anchored to the ground as a permanent outdoor solution. A leveled gravel surface is required, so our assembly team can set up the pavilion.
