STABILITY

LIGHT

The pavilion features a single STROHBOiD wooden lightweight construction as a standard.

Ultimate load	4,409.2 lbs
Snow load	4.1 lbs/ft ²
Wind load	62.1 - 87.0 mph**

STRONG (Add-On)

The pavilion can be extended with a double STROHBOiD wooden structure for more resistance .

Ultimate load	22,046.2 lbs
Snow load	30.7 - 40.9 lbs/ft ²
Wind load	87 - 106 mph**

**By default, the pavilion is designed to withstand wind speeds up to 87 mph. For areas with higher wind speeds, additional ballasting can be added, and the structure can be recalculated for the specific location. This allows the pavilion to handle wind speeds up to 106 mph.

FUNDAMENT

TEMPORARY USE

Can be installed as a temporary outdoor solution on concrete slabs. A leveled gravel surface is required, so our assembly team can set up the pavilion.

PERMANENT USE

Can be anchored to the ground as a permanent outdoor solution. A leveled gravel surface is required, so our assembly team can set up the pavilion.

More details about the Pavilion can be found on our website www.strohboid.com
